Regulators’ Capacity Fund

The RCF funding envelope that was available until March 2025 has been exhausted in the previous call-out (summer 2023). Thank you for your interest

Overview

The Regulators’ Capacity Fund (RCF) responded to calls from Canada’s business community, which was vocal in its desire for regulators to give increased weight to economic and competitiveness considerations in the development and enforcement of regulations. From 2020-2025, the RCF supported 37 projects with over $14.2 million in funding. To help regulators improve their capacity to incorporate economic, competitiveness, and resilience considerations in the design and implementation of regulations, the aims of the renewed Regulators’ Capacity Fund were to enhance the capacity of regulators to accurately assess economic impacts of regulatory proposals; design and administer regulations in a manner that accounted for economic and competitiveness impacts; and incorporate learnings from the ongoing pandemic response and adapt to rapidly-evolving regulatory landscapes.

Regulators' Capacity Fund: Lessons Learned Report

This report documents the lessons learned by twenty-six Government of Canada initiatives that were supported under the Regulators' Capacity Fund between 2019 and 2022, administered by the Treasury Board of Canada Secretariat's Centre for Regulatory Innovation (CRI).
