Accessibility Issues Tracker

[The October 2026 SSC DCT UX Accessibility Issues Tracker](#) is available for download.

Overview

The DCT M365 accessibility issues summary tables surface data and trends in relation to Government of Canada (GC) M365 accessibility issues. The two tables include the following key data labels:

SSC DCT M365 Total Accessibility Issues Summary Table Definitions

- *Total Active Accessibility Issues*: The total number of active (Investigation is underway) M365 accessibility issues.
- *Total Pending M365 Accessibility Issues*: The total number of M365 accessibility issues currently subject to a workload backlog.
- *Total Closed M365 Accessibility Issues*: The total number of closed (fixed to the production environment, or the issue is no longer a problem) M365 accessibility issues.
- *Total M365 Accessibility Issues*: The total number of M365 accessibility issues tracked by SSC DCT.

M365 Total Accessibility Issues Summary Table

#	Issues Summary	Number of Reported Issues
1	Total Active Accessibility Issues	20
2	Total Pending Accessibility Issues	464
3	Total Closed Accessibility Issues	2207
4	Total M365 Accessibility Issues	2691

SSC DCT Accessibility Issues by M365 Application Summary Table

- This table shows the total number of reported issues by M365 product or application.

Accessibility Issues by M365 Application Summary Table

#	Affected M365 Application	Number of Reported Issues
